

Blinder Link - Rack Mount

CHIP ON BOARD LED'S:

Using advanced COB LED technology means the Link produces a clear, bright, and consistent light beam. Fitted with advanced COB LED technology means, the Blinder Link - Rack Mount has a superbright and consistent beam of light covering a wide area. The COBs wide beam angle, in addition to lens geometry specifically designed for side illumination, allows for 200 degrees of visibility.

SUPER BRIGHT:

Producing a powerful 100 Lumens means the Link is bright enough for use any riding conditions.

100% WATERPROOF:

With an IP67 rating, this light can be summered in 1 meter of water and still come out shining.

CLIP WEARABLE:

When not on its designated mount, the Link has a clip that allows a rider to attach it to their bag, their belt or anywhere they wish to have additional visibility.

RACK MOUNT:

Rack Mountable-fits 50mm or 80mm spacing for most common racks-carriers.

USB C RECHARGEABLE:

No need to worry about batteries with Link, simply recharge by plugging into any USB C port using the supplied cable.

8 MODES:

The Link has eight modes to choose from, including: 50 Hr runtime, so whether you are looking for the best battery life or the most eye-catching light pattern, the link has a multitude of options to pick from.

LIGHT WEIGHT:

Weighing just 40 grams this is lightweight in all the right ways.

CHARGE INDICATOR:

Convenient LED glows green whilst the light is charging and turns off when the light has achieved full charge capacity..

LOW BATTERY INDICATOR:

No need to guess when you're light need to be recharged with a convenient LED that lights up red when your light dips below 10% remaining charge.

Riders using bike racks are often left with no good options for mounting their rear light, not so with the Blinder Link Rack Mount which affixes to the rear of any rack leaving an unobstructive view of the light to other road users.
